

Plants With Restricted Propagation January 2011

Dear COPF Members:

Being a member of COPF does not **automatically give you the right to propagate or distribute all COPF-registered plants**. For example, any plant protected by Plant Breeder's Rights in Canada may require a legal license to be obtained before a member may propagate this plant. Producers, including COPF members, must always obtain permission before propagating any plant protected by Plant Breeders' Rights (PBR) in Canada. Holders of U.S. plant patents can legally prevent propagation and distribution in the United States (including shipments from Canada).

All plants listed on this report are registered as restricted plants with COPF by the Breeders. If you wish to propagate any of these restricted plants you should contact the COPF office to determine licensing requirements. It is up to every grower to ensure they are complying with the law and with COPF membership agreements.

While it may be disappointing to find that the plant you wanted to propagate is restricted, you will find that the majority of COPF-registered plants are not restricted. You are welcome to send your plant lists to us and we can advise which plants can and cannot be propagated and/or shipped to the U.S.

Peggy Walsh Craig, COPF Managing Director
